

endurance

LOW PROFILE

The **Endurance LP** provides a combination of comfort and dynamics to users offering natural gait with less fatigue and ultimately less strain on the lower back and sound side. The split keel and heel design provides for Eversion and Inversion range compliance. The Carbon fiber construction promotes energy storage and return throughout the weight bearing walking cycle during every step.

The Endurance is light-weight, simple to assemble and has a cosmesis friendly profile which makes it easy to cover.

The Endurance LP is designed for users with long residual limbs that do not have enough clearance for the Endurance.

Note: When placing an order, please use the below formula.

1115-C(indicate category #)-size L or R
 Example, if you were ordering a size 25, right foot, category 3, the part number would be: 1115-C3-25R

1115
